

ETHYLENE OXIDE TIP PROGRAM OVERVIEW

The EO TechTeam® is a dedicated team of technical professionals committed to assisting Customers through all phases of the EO sterilization validation process.

Through its Total Inclusive Program (TIP), the TechTeam provides turnkey support for all phases of the ethylene oxide (EO) sterilization design process. All services are performed using procedures and equipment in accordance with requirements set out in ISO 11135, and guidelines published by the Association for the Advancement of Medical Instrumentation (AAMI).

What are the Main Features of the TIP Program?

- An all-inclusive offering, from cycle development, protocol writing, laboratory testing through to the final report
- Ethylene oxide cycle development including [selection of appropriate internal process challenge devices \(PCDs\)](#)
- [Sustainable EO® Sterilization Program](#)
- Ethylene oxide cycle validation and protocol/report generation
- Processing for product functionality and/or package integrity evaluation
- Small batch release processing
- Technical consultation
- And more!

What are the Benefits of the TIP Program?

- Each project is assigned its own dedicated project manager with extensive industry experience
- Communication is streamlined with the project manager being main point of contact
- Technical consultation is provided. Therefore Customers do not need in-house sterilization experience
- Extensive knowledge and experience in executing validations with confidence per the industry standard ISO 11135 and on all EO related processes and equipment
- Guaranteed support throughout the lifetime of the validation while maintaining all necessary documentation on file and readily accessible to provide ongoing assistance (Example: Assistance with inquiries from regulatory audits and notified bodies)
- Contingency planning to qualify additional chambers if the initially qualified chamber is unavailable
